

EVERETT IS LOOKING FOR APPLICATION INTEGRATION CONSULTANTS.

Everett is looking for consultants in one of the fastest growing ICT areas: “Application Integration Services” and “Service Oriented Architectures” (AIS/SOA). Everett offers career opportunities both for experienced consultants and young professionals/trainees. Trainees will receive an in-depth training program to become experts in these fields through the “Everett Academy” program. Everett AIS specialists participate in high-profile projects both in the Netherlands and abroad, mostly in top-500 companies and institutes. If this appeals to you then continue to read below.

Who are we?

Everett is a young and fast-growing company that was founded in 1999 and has locations in The Netherlands, UK and India, and currently has approximately 70 employees.

As a Systems Integrator, Everett is primarily specialized in the fast growing areas of “Identity and Access Management” (IAM), Governance, Risk management and Compliance (GRC) and Service Oriented Architectures (SOA). Projects in these areas always have a mission-critical character and are at the core of our clients’ IT infrastructure.

As the Enterprise IT environment becomes increasingly more complex, there is a fundamental need for various enterprise information solutions to be integrated and optimized. There is also a growing realisation of the importance of state of art business processes, which are cohesively supported by a comprehensive underlying IT infrastructure. Together these are the driving factors for companies to reconsider how their disparate applications communicate and interact with each other. This recognition is driving the need for Application Integration. Application Integration technology forms the basis for a Service Oriented Architecture (SOA), a way to transform company information into (web) services for internal and external use. Everett is one of the fastest growing companies in the Dutch AIS market, has a strong presence in the UK and is fast-growing in other regions.

Everett delivers total projects in the Netherlands and outside. Our activities include the whole spectrum from consulting, architecture and design to implementation, production and aftercare

Our culture can be described as informal, pleasant with an international atmosphere, professional, high quality and very focused on personal development. Everett’s goal is always to work with the latest (Internet) technologies in our projects.

Why work @Everett?

- **Innovative Technology**
Everett is an early adopter of market leading integration technologies
- **Challenging Projects**
Everett operates with experienced project teams in challenging projects
- **Reputed Clients**
Everett is present in high profile customer environments
